AlphaLogix
the logical choice

Alpha **Check Data**

Do you run your Sage50 Check Data and Backup routine everyday?

Benefits

- **Peace of mind, data checked automatically**
- **Warns you if something is wrong**
- **Enables problems to be addressed early, preventing data corruption**
- **Saves time and resources**
- **Ability to restore the most up to date working backup**
- **No training or additional software required**

Features

- **Regular, automated checking of data**
- **Early indication of problems**
- **Full daily report (5 days a week)**
- **Off-site backup (10 days history)**
- **No need to supply your password**

Price

- **£400/year including installation**

If not you could be backing up corrupt data and storing up significant problems for the future!

Our service automatically backs-up and checks your Sage 50 data on a nightly basis and sends you a detailed email report the next day, alerting you to any errors, warnings and comments that may have occurred.

Alpha Check Data does not repair your Sage50 data but warns you when something is wrong, enabling you to make the necessary adjustments to avoid serious data corruption.

We understand the importance and sensitivity of your accounts data and you don't need to supply us with your password, as Alpha Check Data can operate without this.

Established since 1994, AlphaLogix is a fully Accredited Sage Business Partner and Developer with a portfolio of products developed to integrate with Sage software. Our team of consultants, programmers and trainers are all specialists in the full range of Sage Accountancy, CRM and Business software systems that we provide.
